# Celebrating the Centennial of the Academy of Prosthodontics

Before prosthodontics was even a specialty, a group of 31 visionary prosthetic dentists met at the Congress Hotel in Chicago in 1918 as the culmination of five years of deliberations, and formed what would become the world's longest-standing prosthodontic academy: The Academy of Prosthodontics. To celebrate this watershed moment, and the subsequent century of leadership by our Academy, we are returning to Chicago for our Centennial Scientific Meeting, to be held May 9th-12th, 2018 at the Sofitel Chicago Magnificent Mile.

This unique hotel designed by French architect Jean-Paul Viguier is a 32-floor prism of glass featuring stunning views of Lake Michigan and the Chicago skyline. The Sofitel provides upscale accommodations just minutes from the Magnificent Mile, Navy Pier, Museum of Contemporary Art, Lake Michigan, and many fashionable boutiques and restaurants.

Our Centennial scientific program has been carefully crafted to reflect the past, present and future of the specialty of prosthodontics, with an incredible international speaker lineup of prominent researchers, clinicians, educators and other global prosthodontic leaders. It has also been shaped to appeal not only to prosthodontists, but also to other dental specialists, generalists, and allied dental professionals.

Our Centennial social program has been designed to celebrate the history of our Academy in the historical context of the city in which it all began, while embracing all that modern Chicago has to offer.

The Welcome Reception & Dinner will be held at the *John Hancock 360 Observatory Deck*, which is located on the 94th floor of the John Hancock Center. It features the best 360-degree views of Chicago skyline and lakefront. The 360 CHICAGO Elevated Event will be sure to start our Academy's Centennial Meeting at a spectacular height.

The following evening, the Group Outing begins with a private tour of the Art Institute of Chicago, founded as both a museum and school for the fine arts in 1879 and today internationally recognized as two of the leading fine-arts institutions in the United States. The tour will be followed by a 1918 Dinner back at the Sofitel, where the music, entertainers and atmosphere will transport us back to the time of the founding of our Academy.

Finally, for the President's Reception & Banquet on the last evening of the meeting, we shall return to the site of the first meeting of our Academy: the historic Congress Hotel. The Congress Gold Ballroom is a beautiful venue and we have planned a wonderful evening of tradition, elegance and entertainment.

I and the Fellows of the Academy of Prosthodontics look forward to sharing this landmark scientific meeting and social program with you as we celebrate the Centennial of our Academy in the great city of Chicago!

Dr. James Taylor  
President, Academy of Prosthodontics

## Nobel Biocare Master Class Workshop

### *Dynamic Navigation for Dental Implants and Beyond - Every Patient, Every Implant, Every Time*

**Date & Time: Saturday, May 12<sup>th</sup> 2:00pm – 5:00pm**

Most dental implants are placed freehand. Dynamically guided implant surgery allows for guided prosthetics which is the primary goal of all implant placement. Evidence based literature shows that computer guided implant placement is significantly more accurate and precise than freehand placement. Improved accuracy, precision and digital collaboration results in more predictable restorative outcomes. Dynamic navigation allows the implant team to guide every implant on every patient in an efficient and ergonomic fashion. This program will review the principle of dynamic navigation, the literature, implementation and finally its clinical application with clinical examples.
